#### Project 4: Information Comics

Using the Comic Life software, compose a 4-6 page info comic that uses dialogue and images to situate and dramatize the concept you researched in Projects 2 and 3.

We have focused so far on the academic essay and the importance of making clear arguments through clear writing, sharpening concepts and their connections through lean, active sentences, coherent paragraphs, and an overall structure that builds toward concluding insights, questions, or recommendations.

At the same time, we have seen that info comics' visual narratives can translate specialized knowledge into common everyday situations and thereby appeal to *logos*, *pathos*, and *ethos* in subtle yet powerful ways: thus, *It Takes a Village* embodies the concept of culturally competent care for Aboriginal women in ways that a scientific article simply cannot.

However, essays and info comics also share many traits, such as tackling conceptual material, incorporating multiple perspectives, and providing choices and recommendations. Essays usually cite different authors' perspectives, while comics often stage different perspectives through characters. Essays present logical alternatives, whereas narratives present characters' behavioral choices situated in specific situations.

In this project, you will apply what you've learned about info comics and essay writing to experiment and create your own info comics. You will need to decide how to translate your conceptual analysis into an engaging narrative. The basic steps:

To create your info comics, follow these steps:

1. Decide on a scenario to situate key elements of your conceptual analysis: use 2-4 characters with three or more scenes that stages the struggle/drama of your concept.
2. Turn your question into a quest: QUEST=ADDRESS A PROBLEM.
3. Outline quest using sparkline (what is/what could be) and why-what-how (problem/explanation/solution).
4. Write up your quest as a 500-750 dialogue with specific scene/location,, protagonist(s), antagonists,, and helpers and hinderers (may be scientists, policy makers, industry, etc.).
5. Storyboard/visualize your quest as a series of images using pen and paper.
6. Collect images using camera, Creative Commons, Google image search, etc.
7. Create full comic using Comic Life (or drawing), integrating dialogue & images and revising as needed
8. Export as PDF and print drafts either in B/W or color to share with friends and family

Regarding characters: what characters can best embody your issue as protagonists, antagonists, helpers, and hinderers? Also, information comics target specific audiences, not just school children, but adults and researchers. Your audience here: fellow students and professors and/or friends and family.

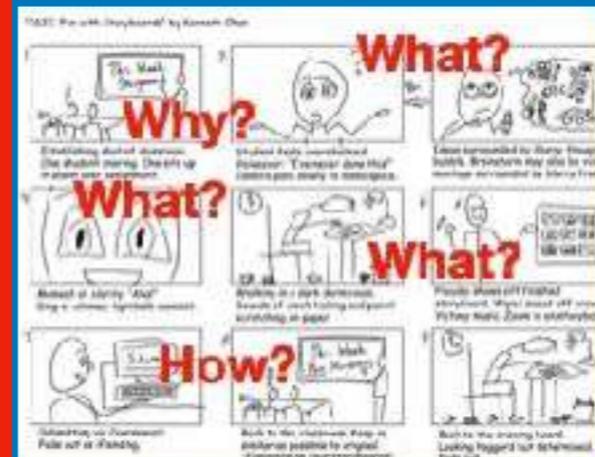

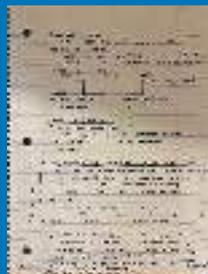

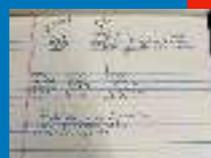

Use Creative Commons or Google Image Search tool to filter for reusable images.

We will hold workshops on dialogues, Comic Life, and narrative sparklines that will provide additional guidance on creating your info comics.

Draft dialogues due: T 10/21 Draft comics due: Th 10/30 Final comics due: T 11/4 Comix Show Fri 11/7

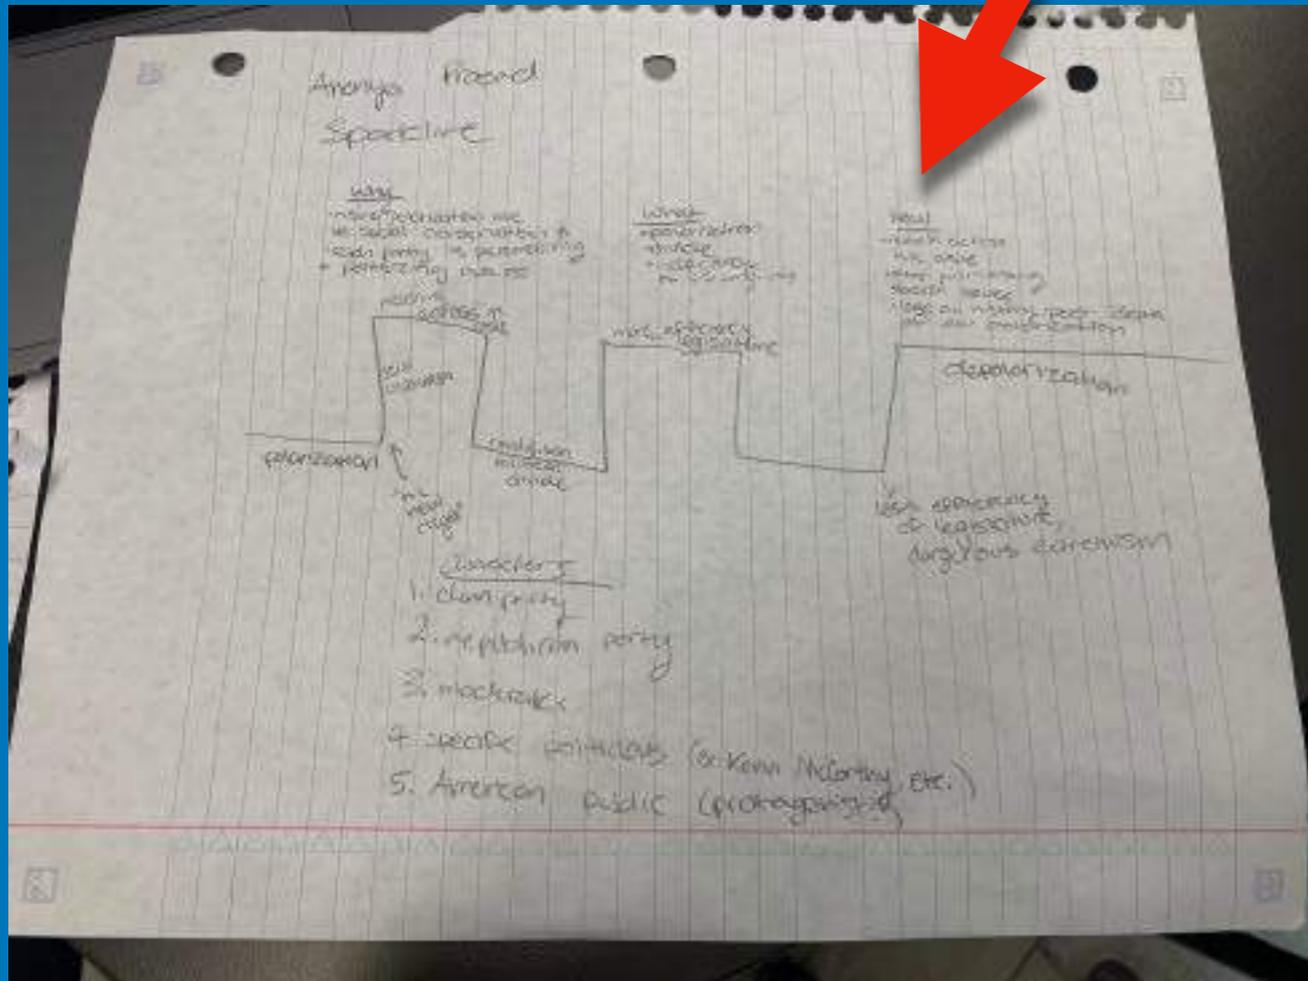

# OPEN WORKSHOP

## Sparklines, Scenario/Dialogues, Storyboards

# Sparkline

# Dialogue

**Scene 1: Intro to the Case**

**Plaintiff's Attorney:** "We are gathered here to discuss the case of Johnson vs. GlobalLink, where the plaintiff's alleged negligence on the part of GlobalLink contributed to the tragic suicide of their teenage daughter, Alexandra Johnson. Both parties are present, and we will proceed with opening statements. Plaintiff, you may begin."

**Plaintiff's Attorney:** "Your Honor, members of the jury, we are here today not just to seek justice for the Johnson family but to hold GlobalLink accountable for the role they played in fostering an environment where cyberbullying thrives. Evidence will show that GlobalLink failed to implement necessary safeguards to protect its users, directly impacting the Johnson's child, Alex, and leading to an irrevocable tragedy."

**GlobalLink DA:** "Your Honor, while we deeply sympathize with the Johnson family's loss, GlobalLink provides a platform for free expression and has policies against harassment. The responsibility of monitoring and containing individual behavior online should not solely fall on GlobalLink. We will demonstrate that the company has made considerable efforts to safeguard its users."

**Scene 2: Witness Testimony - Friend**

**Plaintiff's Attorney:** "Please state your name and relation to Alexandra Johnson?"

**Witness (Friend):** "I'm Jamie Carter, I am... was Alex's best friend. We spent everyday together, and we spent a lot of time on GlobalLink."

**Plaintiff's Attorney:** "Can you describe what Alex experienced on GlobalLink, Jamie?"

**Witness:** "At first everything was fine, Alex would post videos of her singing and people were really positive, but then a nasty rumor started spreading."

**Plaintiff's Attorney:** "What was the rumor?"

**Witness:** "That she had messed around with multiple guys at school. None of it was true but that didn't stop anyone from leaving hateful comments telling her she should kill herself. It was so bad they ended up making a hate group dedicated to her and the rumors surrounding her."

**Plaintiff's Attorney:** "Did she ever report this behavior?"

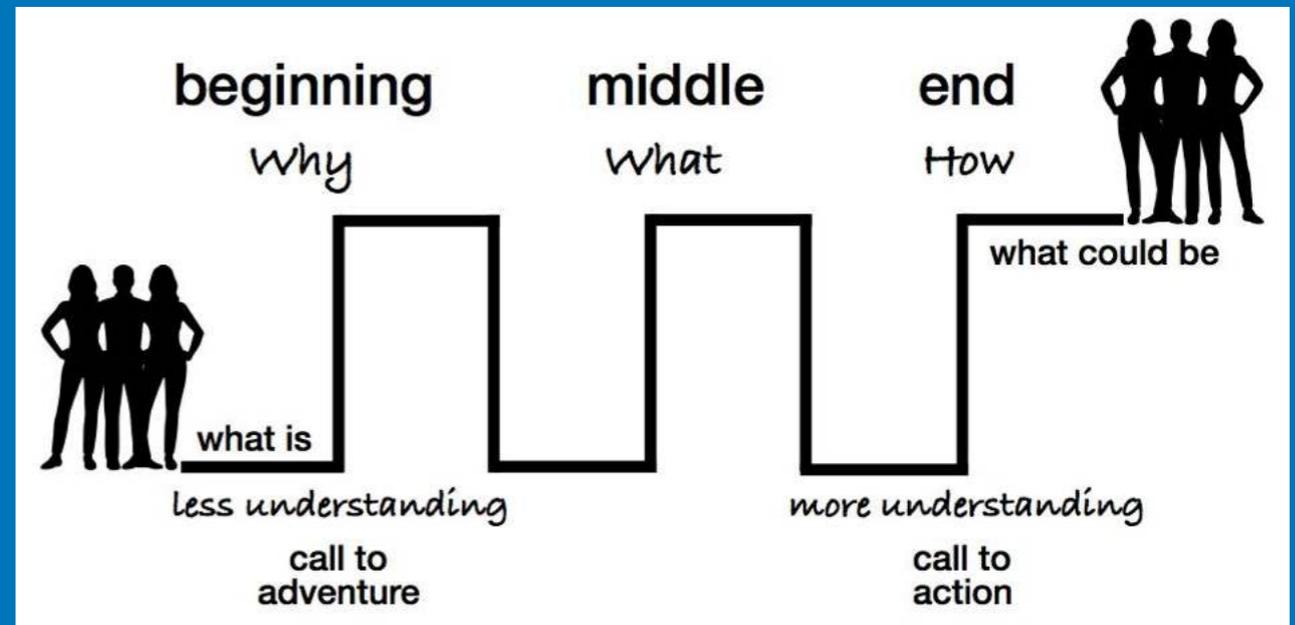

**Witness:** "Yes, multiple times but every time she did nothing would happen or their accounts would be banned for a couple days before they were allowed to come back and keep doing what they did."

**Scene 3: Expert Testimony - Psychiatrist**

**Plaintiff's Attorney:** "Please introduce yourself and explain your expertise?"

**Witness (Psychiatrist):** "Yes, I'm Dr. Emilia Rivera, a psychiatrist specializing in adolescent mental health. And my work primarily involves counseling teens, usually those who have faced cyberbullying themselves."

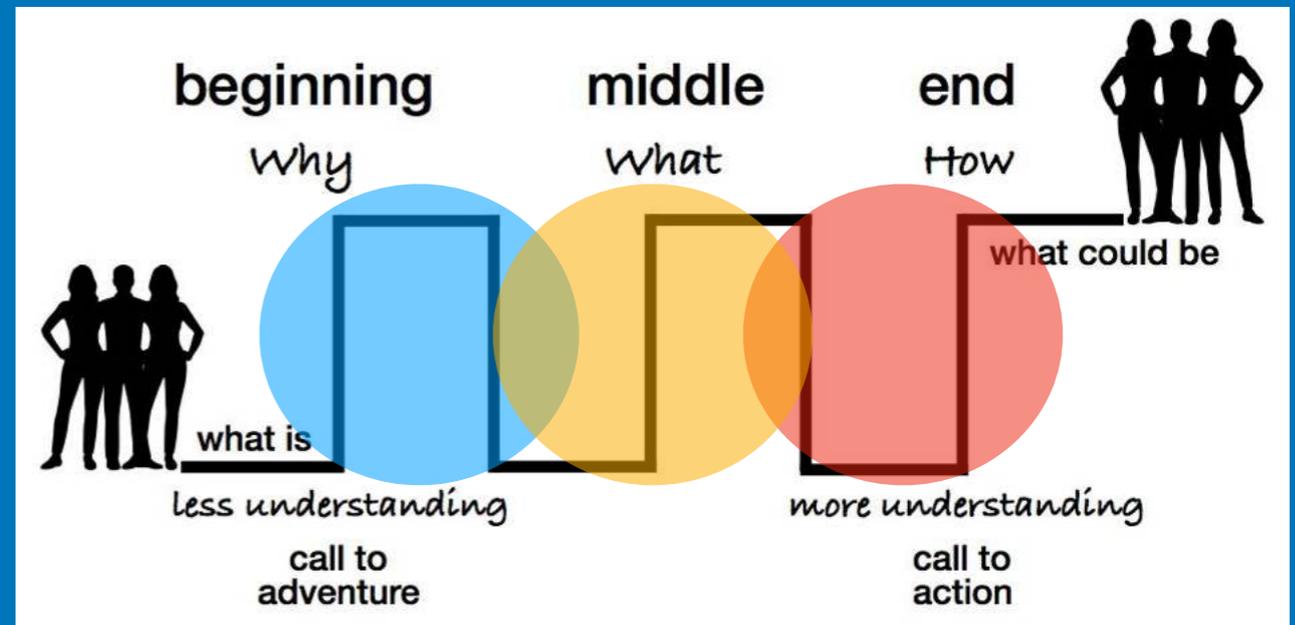

# Sparkline workshop

- Scenario: specific situation in which concept is embodied in life event
- 3-4 Stakeholders as characters, plus protagonist
- Conceptual plotting: Use WWH sparkline
  - Why (context: values and goals of each stakeholder)
  - What (what concept/issue is for each stakeholder)
  - How (actions each stakeholder can take)
- Call to adventure: appeal to values and goals of different stakeholders.
- Call to action: desired actions for different stakeholders.

# Scenario Dialogue workshop

- **Scenario** : a clear quest/question and suitable time and place with flexibility and potential: topos can be
  - literal (robots in robot factory), metaphor (intersectionality at intersection),
  - borrowed (AI in Matrix); abstract (atoms nowhere), surreal (dental floss farm), mix (ITAV)
- **Character dialogue**: stakeholders sharing distinct perspectives and knowledges:
  - Logos and ethos over pathos (concepts and action over emotions)
  - Stakeholders with values and ideas, while Hollywood characters emotions and actions
  - Avoid single or two stakeholder scenarios: goal is diversity of perspectives/ideas

- **Scenes**: Use scenes to bring different stakeholders/ideas together
  - topos where topics/ideas explored, developed, contested, reframed,
  - Scenes arranged in sequence that takes reader from what is to what could be (sparkline)
  - Scenes have internal structure of old/new way, what is/what could be (sparkline)
  - Scenes function like sections/paragraphs that articulate and shape quest/ion

# Dialogue workshop

- Does the dialogue transmediate a specific concept into a good scenario for an info comic?
- Does it have a good title?
- Are there multiple stakeholders portrayed by characters?
- Is there a clear narrative arc (beginning/middle/end) structured by WhyWhatHow?
- Does the comic need more narration (eg, direct framing of scene, background information, definition of concept?)
- How conceptually rich is comic?
- Who is the intended audience?
- How can the author improve the dialogue?
- 

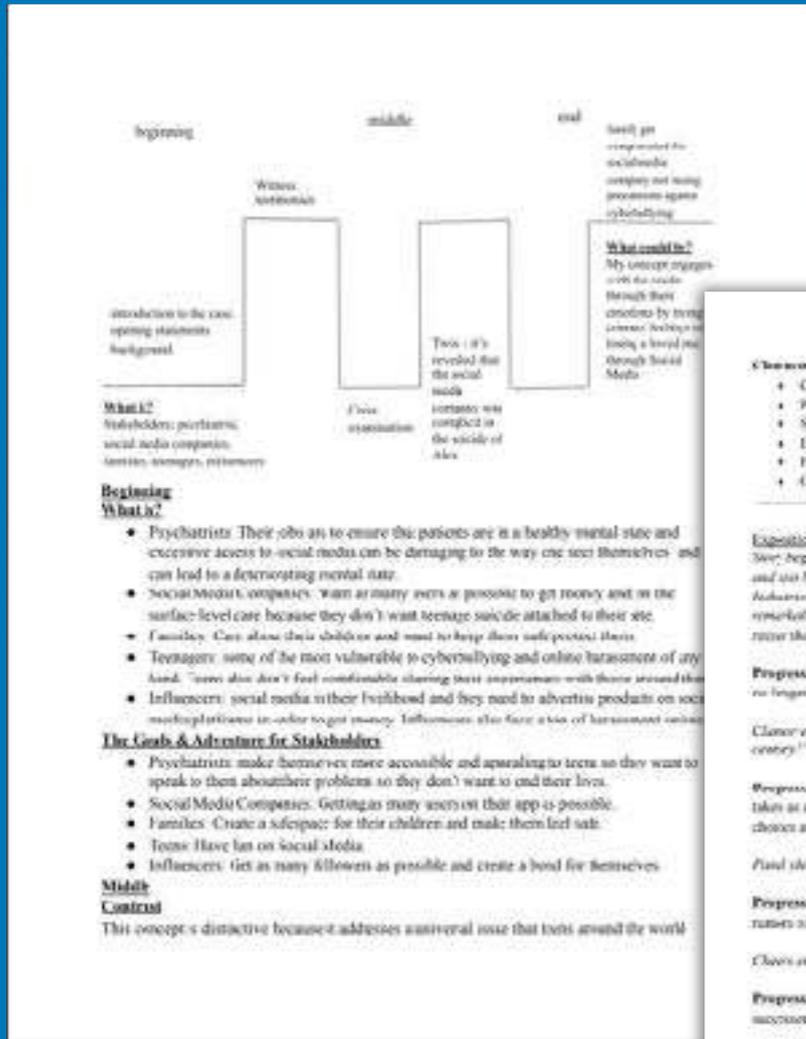

## Tool: Writing Dialogue

### Best Practices:

- Use the scenarios as prototypes or working models of the desired interactions you want to have with your stakeholders. Use the strategic sparkline, strategic matrix and transmedia grid to guide your work.
- Use the why, what, how structure to organize each scenario, focusing on the call to adventure and the call to action, the key moments of engagement and transformation.
- Try starting at the end, with a scenario's call to action and working your way back: write to capture decisions and key steps leading to them.
- At the same time: start fast at the beginning by jumping to the chase, envisioning how the stakeholder hears your call to adventure and enters into the storytelling.
- Use narrator boxes to introduce scenarios and key background information.
- Use dialogue to dramatize information and interactions as well as describe them abstractly. Long passages are fine: dialogues act out and act upon information. Show and tell your project in action while demonstrating its value.
- Use thought bubbles to convey characters' internal deliberations. Avoid dumbing down and strive to smarten up your work by framing it from different perspectives.
- Compose interactions using conversational language, the way you speak out loud to others. Avoid slang and jargon while using everyday language to translate and share specialized terms associated with your project.
- Write about a page of double-space dialogue for each stakeholder, striving for clarity and concision, focusing on calls to adventure and action, STAR moments, and the dramatic arcs of transformation.
- Scenarios can run one after the other with different sparklines, or form a layered structure with one overarching sparkline, or be embedded or entwined within different sparklines, much like TV shows and life. Err on the side of simplicity and concreteness.
- Use the sparkline, matrix and grid to model interactions between different stakeholders and transmedia forms, as well as different platforms they appear on: if you don't know your stakeholder's media ecology, where and how they engage with your work, do some formal or informal demographic research.

# Transmedia Shuttling/Channel Switching

## Sparklines, Scenario/Dialogues, Storyboards

**Who saves the order of appearance?**

- Council (Assemblage of Kamashi representing parents and industrialists)
- Progress (Nihilistic and fearless character who is Shichi's mother and head of the best Team research)
- Shichi (Miser and her to love Tomoe)
- Eboshi (Scientist)
- Haku (Environmental activist)
- Oshichi (Buddhist monk)

**Exposition**  
 Over, begins in a large conference room. The council members are gathered and via their reveal the different sections of the council: the Mourn, the Construction Industrialist, and the Atomistic Industrialist. At the head of the council is a chair made of concrete a fearless person stands in shadow. The only remarkable thing about this person is a complete on their desk which reads "Progress." Tomoe with the nameplate raise their hand and a book falls over her head.

**Progress:** M. Follow council members I must share with you all quite alarming news. Mount Tomoe appears to have been no longer.

Clamor erupts as council members whisper "debatable" and "But we're best using our from century!"

**Progress:** I am well aware of your grievances and fully empathize with them, but this situation takes as a tragedy. No! My fellow shape-shifter of the world, the news is a call for celebration! choice at hand.

**Final choice for not choice:**

**Progress:** The first choice is to remove Mount Tomoe completely and dig underneath it, to see a run of underground labyrinth of iron. The second choice is to take our progress elsewhere.

**Choice comes as people cheer "Remove Mount Tomoe!" and "Move Mount Tomoe!"**

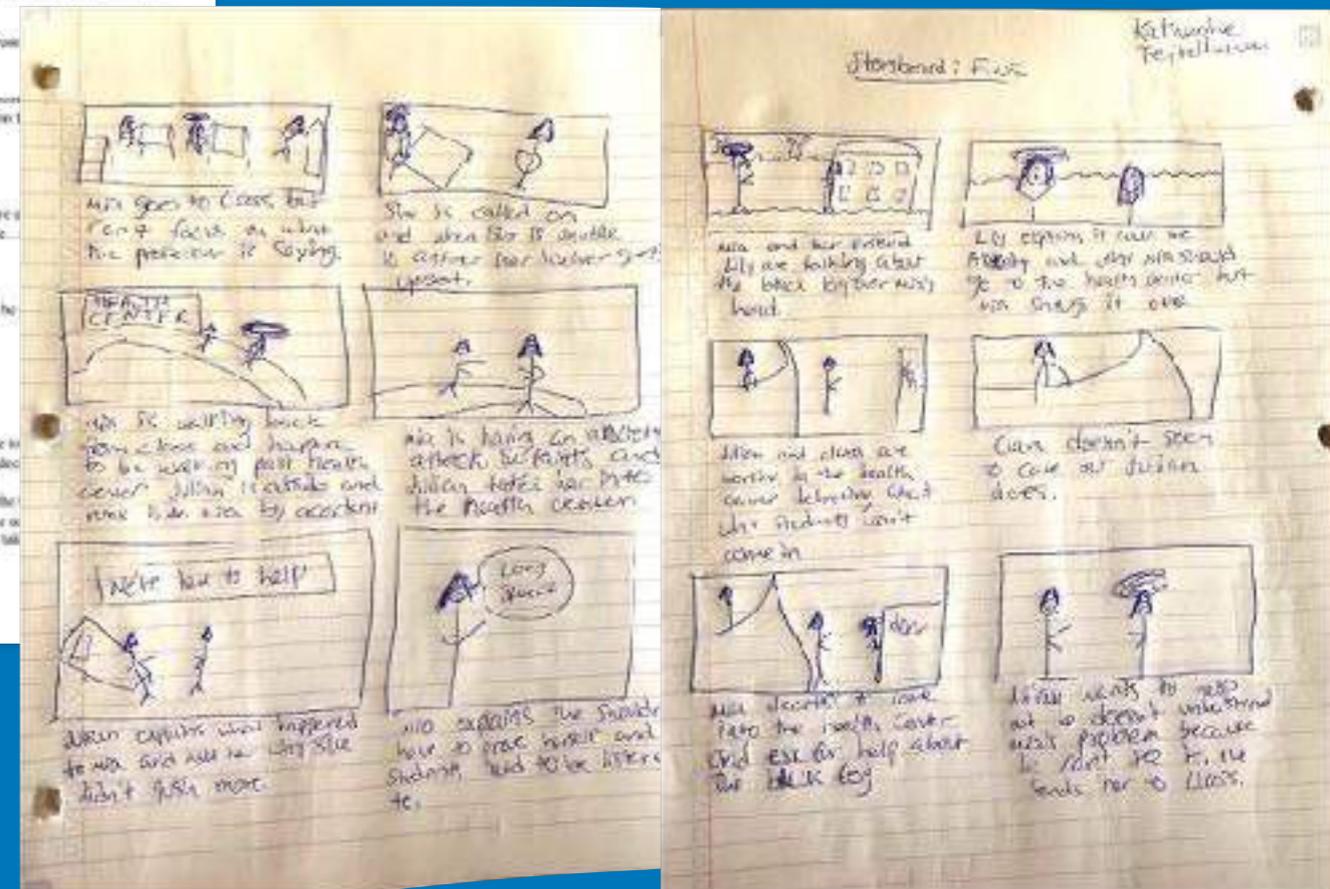

**Progress:** The choice, which would normally entrust to my esteemed council, will actually be successful to be ownership of Tomoe and the lands of around it. Shichi.

**Final choice Shichi: speak in a spotlight, contrasting with the darkness surrounding him.**

**Progress:** Shichi, what is your decision?

**Shichi:** Forgive me, mother, but I will need more time to decide. Please, allow me to venture to further assessments. When my journey is complete, I will return to the council with my final decision.

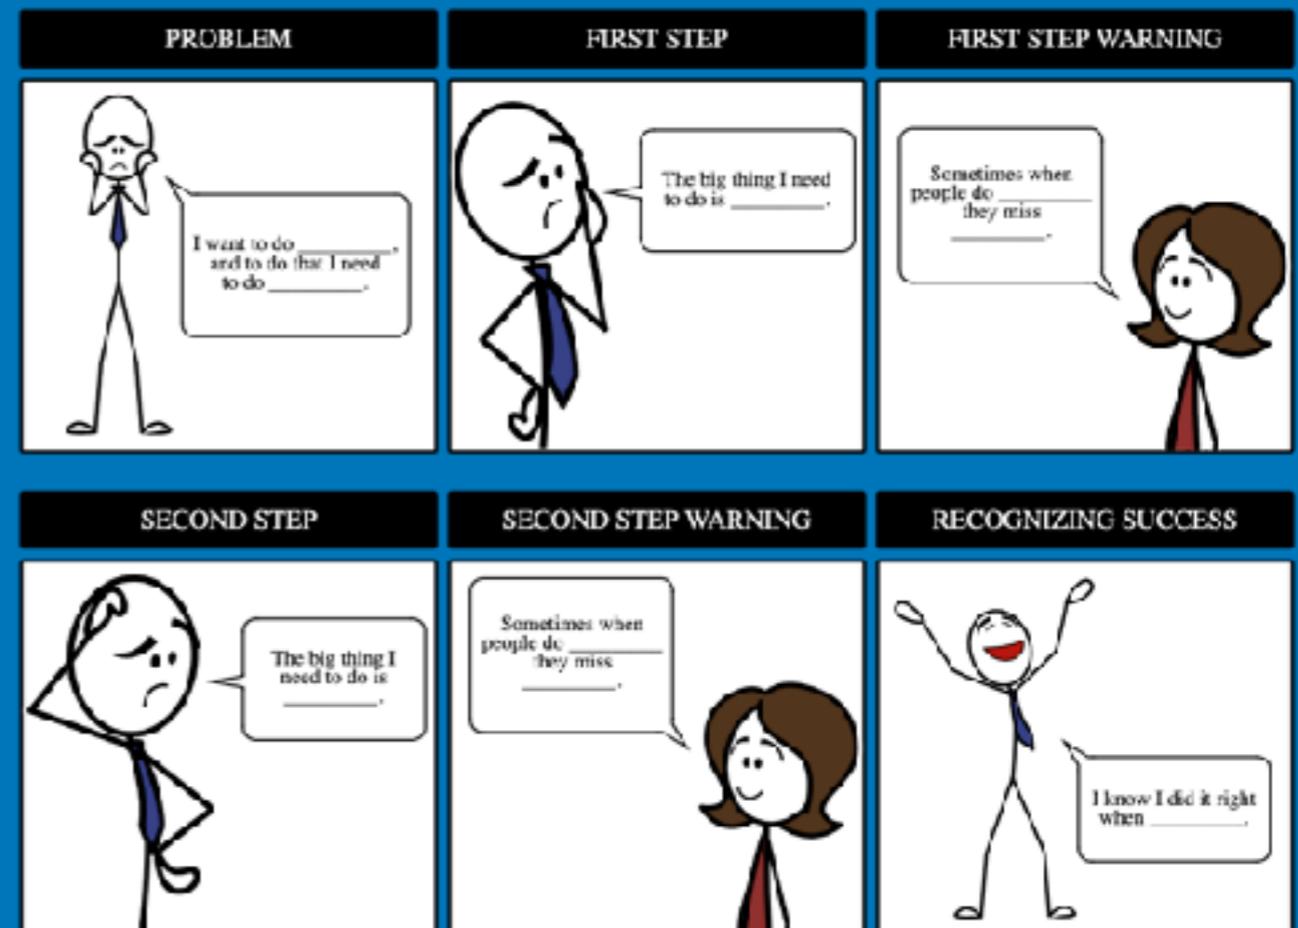

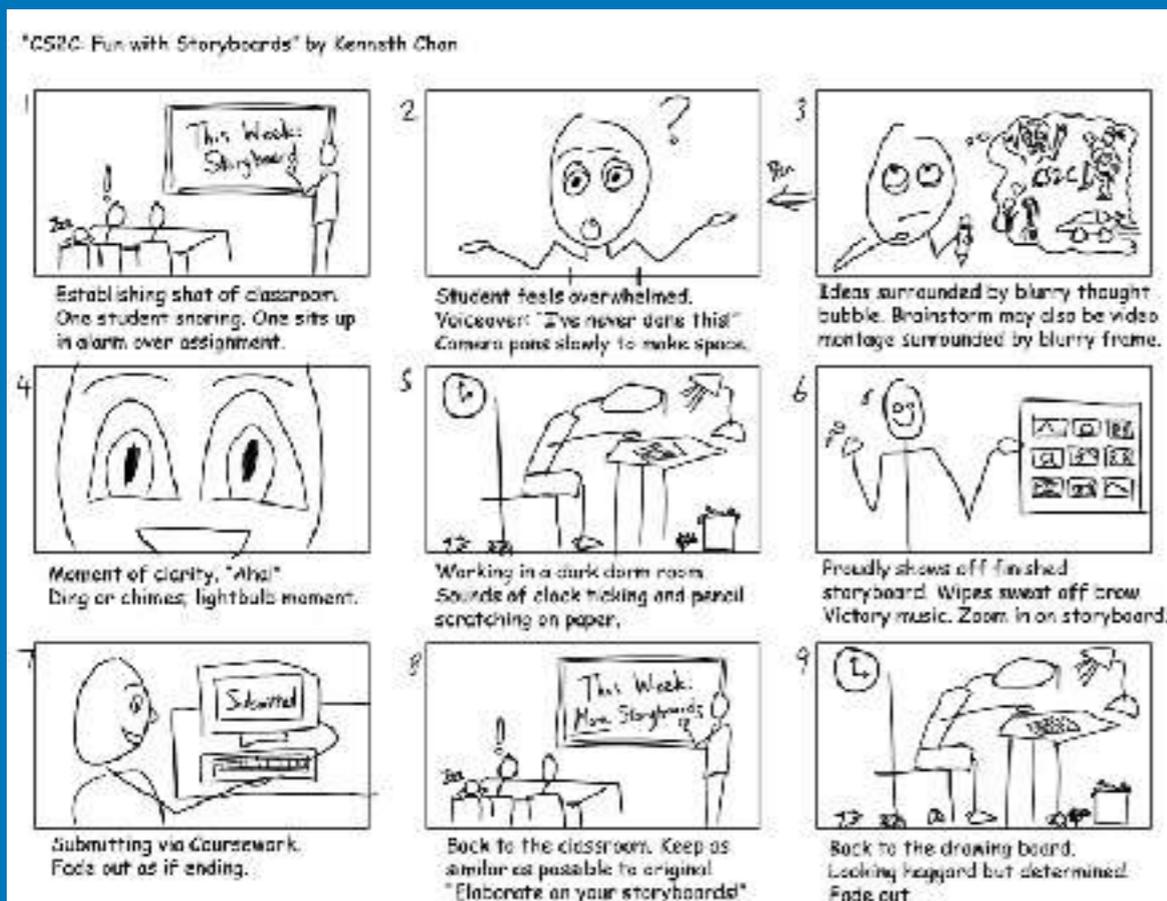

**Progress:** Very well. You have all hours, dear Shichi. But remember, these two options are the maybe no other? Know your place, and the plays of all humans we are doing the world. "be or and remains—these are All I can? Nature." Is just a reminder if resources we can keep or take yours.

# Storyboard

Storyboards are rough drafts for films, comics and other visual narratives.

- Break dialogue scenario into different scenes
- Draw stick figures either noting or including text of dialogue and narration
- Work with distributing graphic narrative into full pages
- Don't forget title masthead or comic cover
- Your comics will be in tall "portrait" format, not wide "landscape" format

Create your own storyboard that
